

# About Coronavirus

Coronavirus is a new illness. It is sometimes called COVID-19.

It can affect your lungs and breathing.

There is a **low chance** of you getting coronavirus.

This means that you probably won't get ill.

There is no vaccine for coronavirus.

A vaccine is a type of medicine that stops you from catching an illness.

But you can stop germs spreading.

Cover your mouth and nose with a tissue when you cough or sneeze.

Put used tissues in the bin straight away.

Wash your hands with soap and water.

Avoid close contact with people who are ill.

Do not touch your eyes, nose or mouth before washing your hands.

When people have coronavirus they:

- Are coughing

- Feel very warm

- Get out of breath easily

**Call 111** if you think you have coronavirus

If you have coronavirus you need to stop it spreading...

Do not go to the doctors, pharmacy or hospital.

Stay at home.

Ask friends, family or support workers to get things for you.

Do not have people stay in your home.

You can take cold and flu medicine to help you feel better.
